

User login Username: admin Password:Admin123

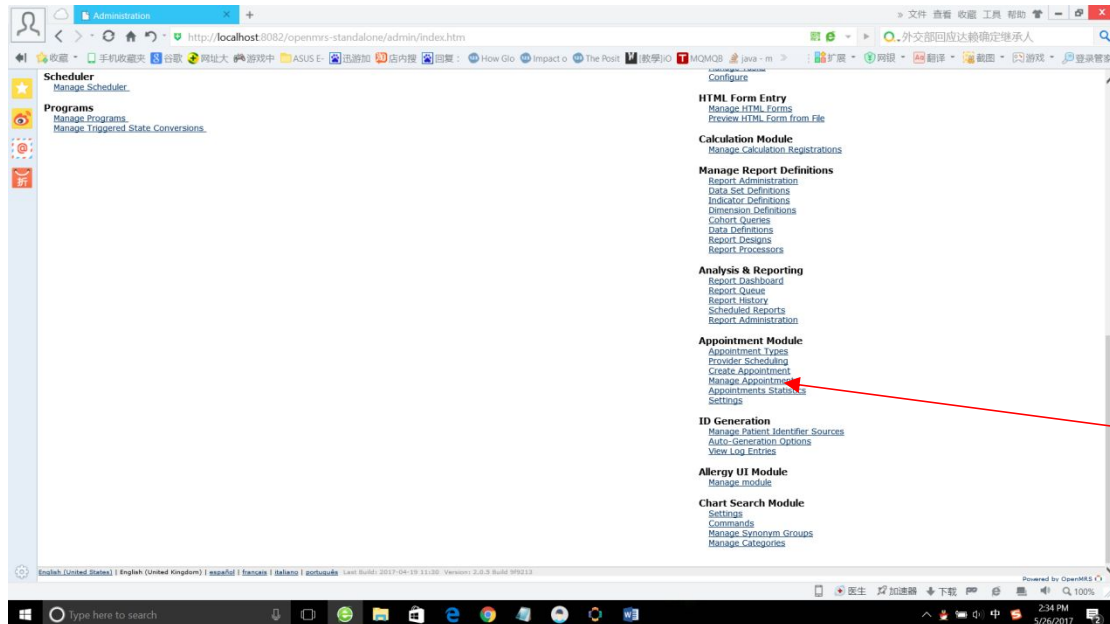

Choose Registration location.

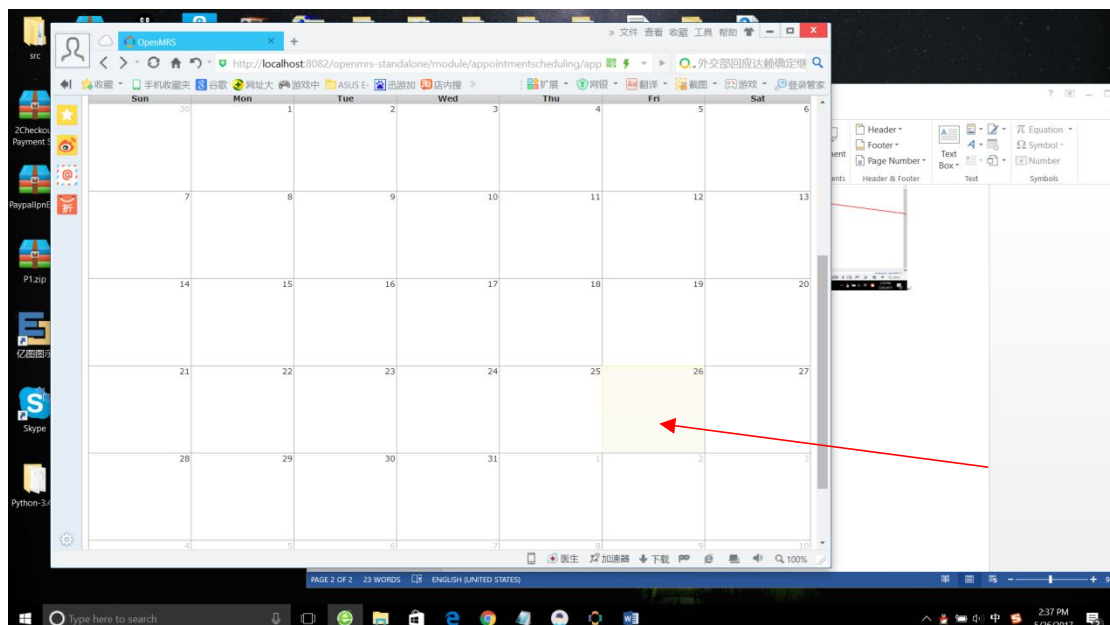

Click System Administration

Scroll down to Appointment Module , click Provider Scheduling

Pick a provider day on the calendar

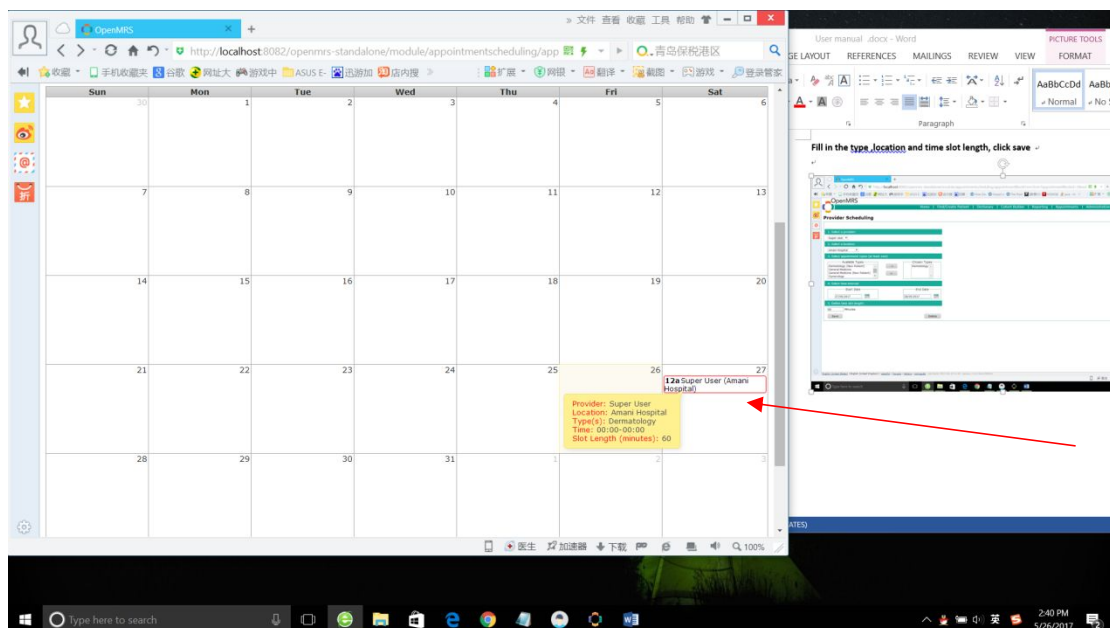

Fill in the type ,location and time slot length, click save

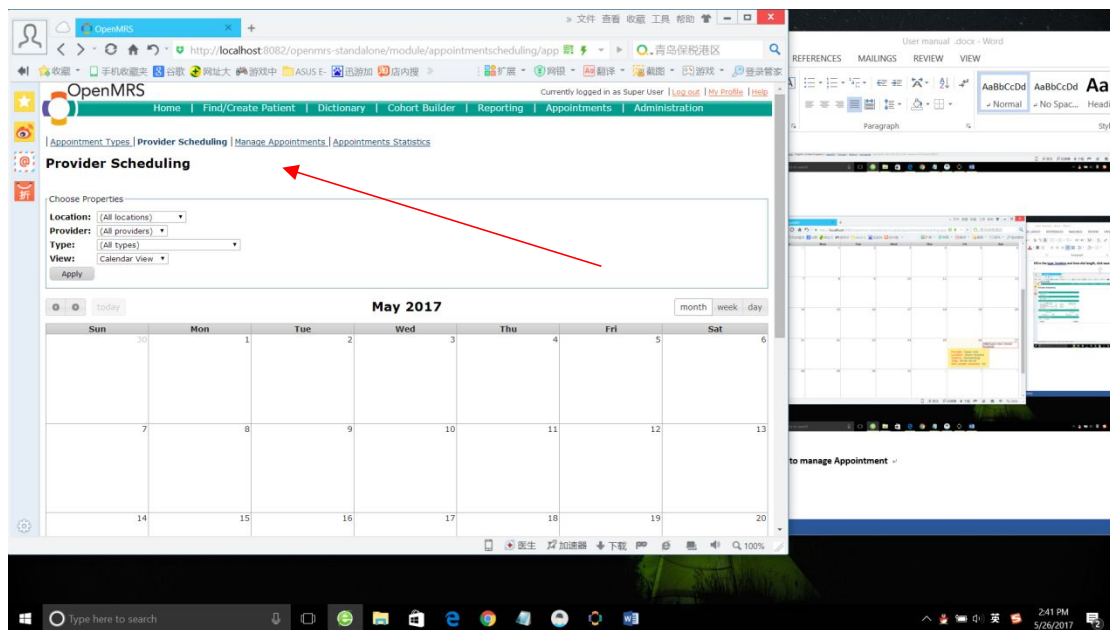

The screenshot shows the 'Provider Scheduling' form in the OpenMRS application. The form is titled 'Provider Scheduling' and contains the following sections:

- 1. Select a provider:** A dropdown menu showing 'Super User'.
- 2. Select a location:** A dropdown menu showing 'Amani Hospital'.
- 3. Select appointment types (at least one):** Two columns of dropdown menus. The 'Available Types' column shows 'Dermatology (New Patient)', 'General Medicine', 'General Medicine (New Patient)', and 'Gynecology'. The 'Chosen Types' column shows 'Dermatology'.
- 4. Select time interval:** Two date pickers for 'Start Date' (27/05/2017) and 'End Date' (28/05/2017).
- 5. Define time slot length:** A text input field showing '60' minutes.

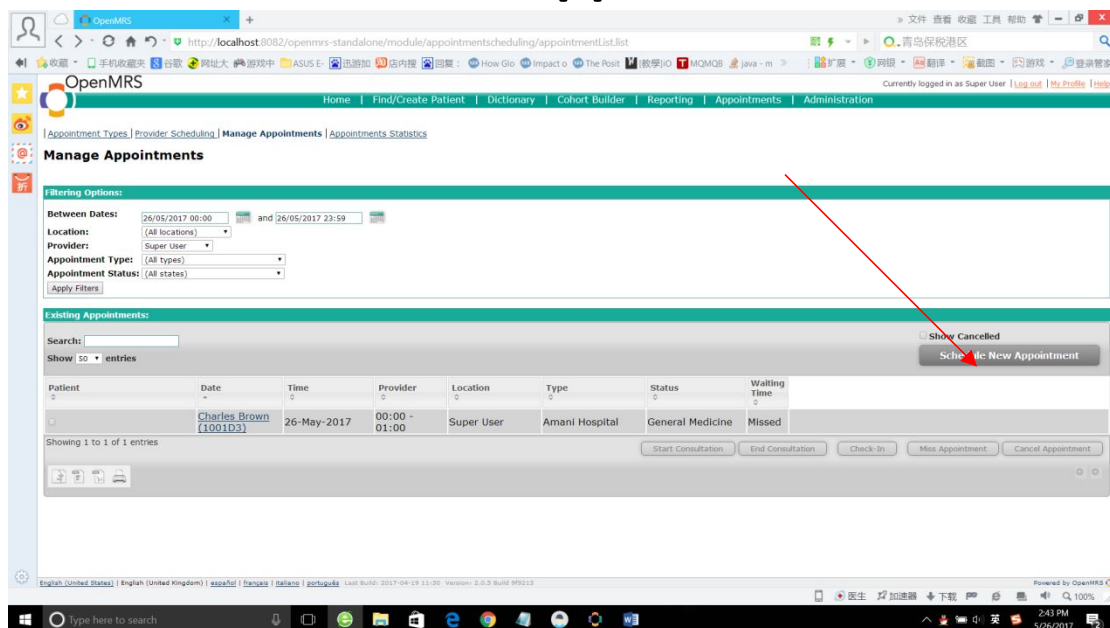

At the bottom of the form are 'Save' and 'Delete' buttons. The browser address bar shows the URL: <http://localhost:8082/openmrs-standalone/module/appointmentscheduling/appointmentBlockForm.form?appointmentBlockId=3&red>. The OpenMRS logo and navigation menu are visible at the top.

Now go to manage Appointment

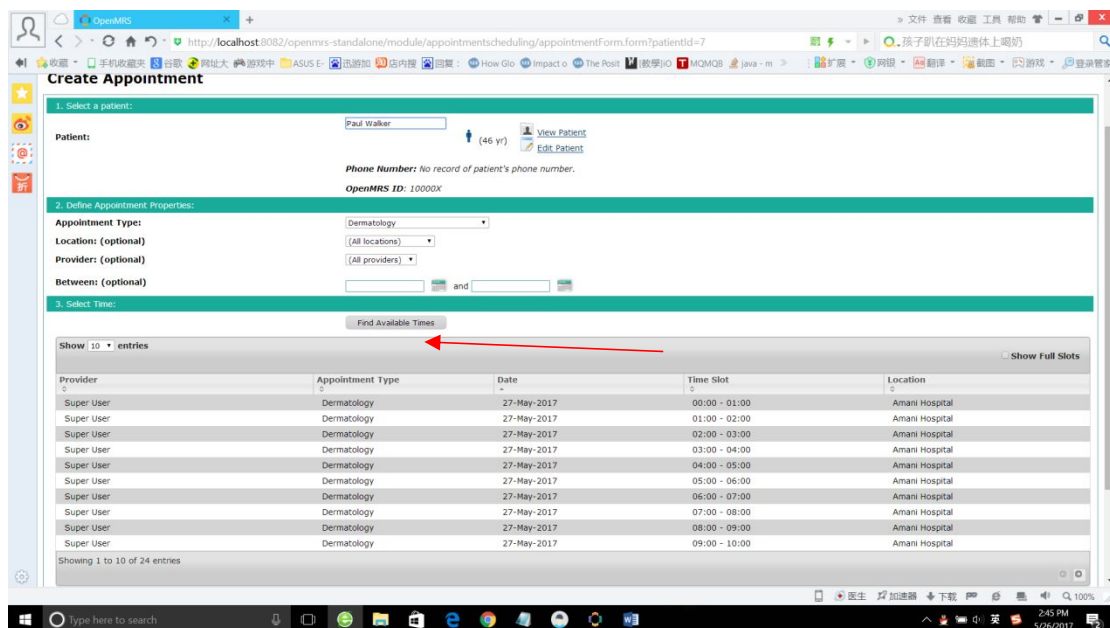

Click schedule new appointment

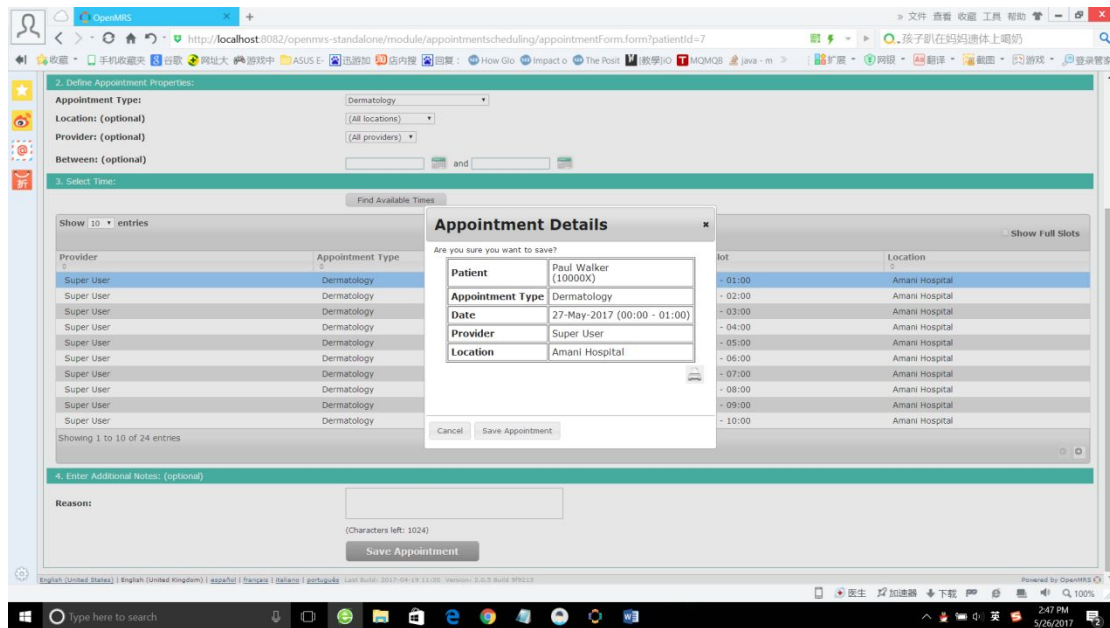

Enter patient id or name ,click find Available times

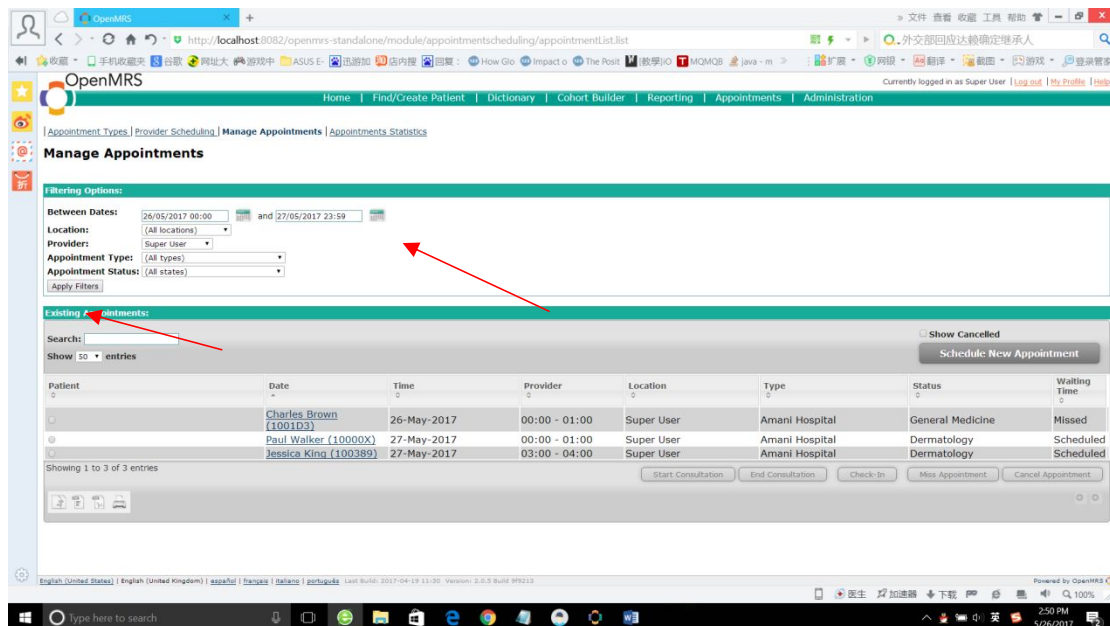

Pick any time slot and click save Appointment

Apply filters setting date in between the provider's schedule.

Display list of existing appointments(that I just create)

For patient attend appointment on time , allowing them to make appointment without paying desposit.
